**\*\* PAPER FEED DIRECTION- GRIPPER EDGE MAKES A DIFFERENCE BECAUSE OF THE POLARITY OF MAGNETS.**

**\*\*OTHER SIZES AVAILABLE FROM THE MILL IN FULL CARTON QUANTITIES**

[www.magnecote.com](http://www.magnecote.com)

**HELPFUL HINTS IN PRINTING YOUR MAGNETIC PAPER**

**Fan Sheets:** to help eliminate any sticking between sheets.

**Advance several sheets through press:** to find any areas magnet may stick.

**Potential Solution:** tape aluminum plate over area (cut plate to fit on feeder on steel registration board).

**If you have a double sheet detector:** Mechanical double sheet detectors need to be set up for all paper. On some presses the electronic double sheet detector may have to be shut off.

**Check blanket type:** use of compressible style recommended.

**Delivery area:** more than usual spray powder recommended. However, make sure area is as clean as possible before printing.

**More air on the slow down wheels:** will help in the delivery.

**Dryers:** keep drying temperature under 120\* F.

**Feeder table wheels:** need to be set light to reduce pressure.

**Delivery area load:** estimate weight limit.

**Post printing operations:** use smaller stacks if die cutting or trimming. Fan the sheets prior to packing. Take proper pre-press precautions—leave at least 1/8" between cuts.
